Prerequisites check	02002
	02003

---

Carry out the steps below.

1. Double-check that you have downloaded and extracted the files in a folder where you plan to collect material for the programming course. Create such a folder if you do not have it yet. Hint: A good location is somewhere in your Documents folder.
2. For each of the extracted files, identify the file extension and file format. Hint: Usually, one can determine the format of a file based on the filename extension.
3. Open and examine the content of the text file `facts.txt` file. Hint: If you use Windows, you can use Microsoft Notepad. In MacOS you can use Apple TextEdit. Optional: Investigate which programs you can use to view or edit the `facts.txt` file. Can you open it with a browser?
4. Copy the `facts.txt` file using the filename of your choosing, for example, call the copy `facts_my.txt`. Hint: this can be done using a *Save As* option from the text editor, or by copy-pasting and renaming the file from your file manager.
5. Modify the content of the `.txt` file you just created. You can choose to write your name and the date of birth. Save the file with the new content.
